

I came to live in St Erth about 20 years ago after a serious prolonged illness forced premature retirement. Having always been a very busy individual I saw an opportunity to become involved in a great community, joining a number of events teams and the committee of 3rd St Ives Scouts. A few years later we were joined by our daughter and grandson Connor who was enrolled at St Erth Nursery and then the school, where he blossomed giving us a further interest in the school and its events.

In my working life as an engineer I managed and coordinated demolition and dismantling projects for many industries throughout the country which involved having a good knowledge of health and safety to mitigate risk. Hopefully I will be able to use this experience to spot and assist in pointing out any potential hazards in order to safeguard the school environment.
